EDUCATION

Currently pursuing a Bachelor's degree in Software Engineering, 7 out of 8 semesters completed.

SKILLS

- Proficient in JavaScript, NodeJS, ReactJS, Docker and Kubernetes. I feel comfortable with TypeScript, Go/Golang, Vue.js, AWS, GCP.

EXPERIENCE

Clinicorp Solutions, Software Developer
DEZ 2022 - CURRENTLY

- I completed a extensive project that utilizes React and Node.js technologies. This project holds significant importance for the company, generating a monthly revenue of 500 thousand BRL. Throughout the development process, it was essential to implement cloud tasks, cloud functions, and Dataflow/Jobs data streams. Furthermore, I achieved a test coverage of 100% using the Jest framework.
- I improved the performance of a system component that handles a massive amount of data using various techniques such as Node.js stream, gzip, React Context, etc.

Upflux, Software Developer
MAR 2022 - NOV 2022

- I created a backend using C#, unit testing, and REST, applying the SOLID principles and TDD.
- I added a CI pipeline to check the code quality using Sonarqube integration.
- I conducted automated E2E testing to check for bugs in the frontend screens using Cypress and Cucumber.

DevHero, Software Developer
FEB 2021 - SET 2021

- I worked as a Full Stack developer, using Node.js and Vue.js.
- I developed a backend using Golang/Node.js and GraphQL, applying the principles of Clean Architecture, TDD, and SOLID.
